## HD-8030 Conductor conductor resistance fixture

This fixture is mainly used to measure the DC resistance of the conductive core of wire and cable with the bridge tester. It can measure the DC resistance of round wire, stranded wire, flat wire and fan wire. It can also be attached to the terminal to measure various specifications of enameled wire below 0.1mm.

### Technical Parameters:

Serial number	Project	Specifications
1	Measuring sample length	1000mm
2	Maximum measured sample area	350mm <sup>2</sup>
3	Current and voltage end spacing	60mm
4	Clamp contact width	60mm
5	Current end shape	Rounded tiger mouth
6	Voltage end shape	Fillet knives
7	Dimensions	1250 X 150 X 110 (Width X deep X height)
8	weight	About 10 Kg
