PRODUCT DETAILS PRODUCT VIDEO

Application

This testing machine is mainly used for repeated bending test of metal wire and testing performance and defect of bearing plastic deformation at the process of bending metal wire repeatedly. You can operate on digital display screen and it shows bending times. It can also process sheet metal bending test after using sheet clamping device.

Features

By changing different specification clamping jaws that can do a variety of specifications of materials bending test.

Stepless speed test. Equipment stable performance, compact structure, reliable quality.

Simple, bending frequency digital display.

2.5 Low noise running smoothly, reliable long life, reasonable design, easy maintenance.

Main technical parameters

Item	Parameters
Sample Diameter(mm)	Φ1-Φ10
Sample Length(mm)	150-200
Bending Angle	±90°
Bending Speed (times/min)	≤ 60
Numeration Range(time)	0-9999
Motor Power	1.5Kw
External Dimensions(mm)	600×330×1000
Tester Weight	210 Kg
