Quality is more than a word

Environmental Stress Chamber

AR series Standard Type

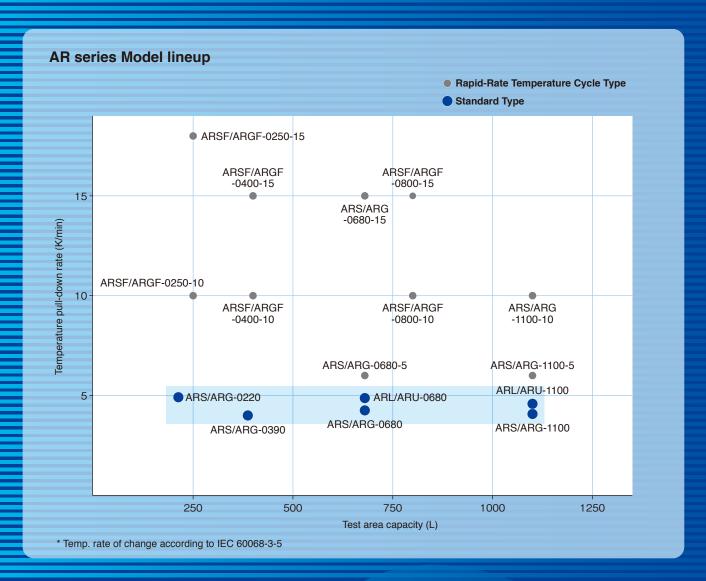

Global standard model for a new temperature (&humidity) chamber that meets the needs for high loads, high stresses, and large sizes

The Environmental stress chamber AR series supports heat load and provides faster temperature cycling performance with a wide temperature and humidity control range.

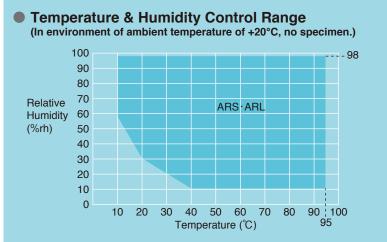

Features

Select from 12 models to meet your test applications

Product images shown may include options.

^{*} Continuous operation at or below $+40^{\circ}$ C is limited because of frost formation on the cooler and dehumidifier.

Model lineup for standard type

* ARS/ARL: temperature & humidity * ARG/ARU: temperature only

Temperature & Humidity Range

Minimum temp.: -45°C/-75°C Maximum temp.: +180°C

Humid. (ARL/ARS only): 10 to 98%rh

Temperature Change Rate

Approx. 3K/min, with 50kg of specimen*, −75⇔+180°C. (ARS-1100) This can also be used for acceleration testing.

*Specimen as aluminum, including 12kg of shelf

Specimen Temperature Control

Attaching a temperature measurement sensor to the specimen enables the temperature of the specimen to be monitored and controlled, which makes tests even more accurate.

Heat Load up to 4500W

AR series is desirable for testing large heat loads at temperature cycling test and at 85°C/85%rh test. Allowable heat load is different depends on models and operation conditions. (Page 7 to 10)

- *For your safety, please be sure to connect the power through specimen power supply control terminal.
- *Temperature-triggered circuit breaker is available (customized option).

Features

Easy Access to Specimens

Cable ports are fitted as standard to enable easy access to the inside of the chamber from the left and the right. An even larger ϕ 150 mm cable port can be selected or added as an option, while a door notch that enables cable wiring to be routed through the door is also available.

A large window option with test area lamp can be added to the door to observe the test sample. The window is heated to prevent moisture and ice build-up.

Size of Viewing Window

W340×H440mm

Global Safety Standards

ISO 12100 (Safety of machinery) IEC 60204-1(Low voltages) IEC 61000-6-2, IEC 61000-6-4 (EMC) EN 50581 (RoHS) Pressure Equipment Directive CE marking

Test area(ARL-0680)

Viewing window (option)

Test Standard Conformance

• IEC 60068-2-1: Cold • IEC 60068-2-2: Dry heat

• IEC 60068-2-78: Damp heat, steady state

• ISO 16750-4 (5.3): Road vehicles (Temperature cycling)

Controller

Program Copy and Computer Editing Copy Standard Type Rapid-Rate Temperature Cycle Type Edit

* Some items may not be copied between different models and chambers with different options.

Faster and smoother user interface

The user interface uses tabs for faster access to any screen.

The bright and clear 7" color LCD is easy to read.

Chamber Lamp ON/OFF

The chamber lamp can be switched ON and OFF from all screens.

*Chamber lamp is equipped with viewing window option

Multilingual Support

The language can be changed with the screen settings (Japanese / English / Chinese (simplified / traditional) / Korean).

Store up to 40 programs

Program operation: 40 patterns (99 steps

per program)

* Available on request

Constant operation: 3 patterns

Test Data Records

Temperature & humidity settings and measurement values can be recorded on the internal memory and external memories.

Information Function

The INFO icon will blink when chamber information requiring attention.

• Inspection Period Notifications It is possible to randomly preset the period and details of inspections for humidifier plates and condenser filters.

Program Pattern Copying

It is possible to copy program patterns between chambers with the use of USB flash drives without the need for PC operations.

(USB flash drives not supplied.)

Chambers Can be Operated from PCs and Tablet Terminals

Remote Monitoring and Control (Ethernet Connection)

The chambers are equipped with unique web applications that enable chamber status to be confirmed and operated from a web browser screen (PC or tablet terminal). It is also possible to start operations with a PC or other device from a remote location.

Editing Test Profiles with a Browser

It is possible to edit the program patterns registered in the testing chamber with a web browser.

Displaying Data in Graphs

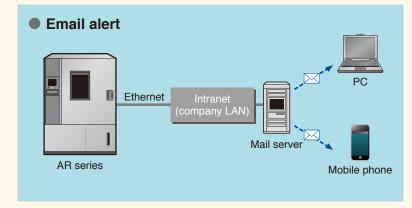

Settings and measurement values saved in the testing chamber can be displayed as graphs on a web browser.

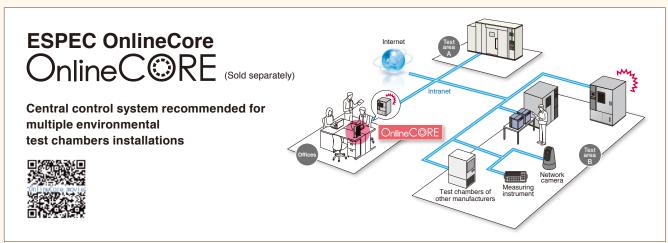

E-mail Notifications

Details on alarms that have been triggered will be sent to pre-registered e-mail addresses. It is also possible to transmit e-mails when testing has finished.

* An Intranet environment is required to transmit e-mails.

^{*}Please contact ESPEC for more information, about which products can be connected.

Options

Power cable

- 2.5 m
- 5 m
- 10m
- * A power cable is not equipped as standard.

Continuous water supply

A water circuit to supply pure water continuously to the chamber.

• Pure water coupling with pressure-reducing valve

Pure water coupling (with pressure-reducing valve)

	Pure Water Coupling
	With Pressure-Reducing Valve
Water pressure	0.05 to 0.50MPa (Gauge)
Conductivity	0.1 to 10μS/cm
Connectable items	Only a steel pipe (or a PVC pipe) can be connected.

^{*} Water supplier shall be connected by the customer.

Water purifier (WS-1)

Use to continuously supply pure water. Produced water capacity: 12 L/h (Water temperature: 25°C)
Size: W480×H400×D280 mm (20kg)

Water leak detection system and dew tray to catch dripping water are also available to detect and prevent water damages.

Viewing window

Used for observation of the specimens inside the chamber.

Dimensions: W340×H440 mm

Additional cable port/Door notch

- ø50mm
- ø100mm
- ø150mm
- Door notch H100×D50mm
- * Each cable port is equipped with a silicone sponge rubber plug.

ø50mm

Door notch

Cable port rubber plug

- ø50mm
- ø100mm
- ø150mm
- · With slits ø50mm
- · With slits ø100mm
- · With slits ø150mm
- Spiral-wrapped plug (5×50×2000mm)
- · For door notch

ø50 mm

With slits ø150 mm

Spiral-wrapped type

Shelf/shelf bracket

The same with standard accessory.

Heavy-duty shelf

Used to hold heavy specimens exceeding the load capacity of the standard shelf.

· Load capacity: 50kg

Model	0220	0390	0680
Floor load resistance (kg)	50	80	80
Support strength (kg)	50	80	80
Weight / shelf (kg)	3	4	8

Floor reinforcement

Increase the floor load capacity of test area.

Up to

- 100 kg
- 200 kg
- 300 kg

Computer interface

- · RS-485
- GPIB
- · RS-232C

Communication cables

• RS-485 5m/ 10m/ 30m • GPIB 2m/ 4m

Wet bulb wick

Consumable spares for wet bulb wick (standard accessories).

Fine wick FW-5 (24 wicks)

Options

Paperless recorder

A temperature & humidity recorder that utilizes a liquid-crystal display fitted with a touch-panel. Display: 5.7inch color touch panel Scan interval: 5 sec. (default) Internal recording media:

Flash memory 8MB

External recording media:

CF memory card (Supplies with a 256 MB CF card) USB flash drive

< Temperature type >

No. of input channel:

Temperature 1

(5 more channels can be turned ON)

< Temperature & humidity type >

No. of input channel:

Temperature 1, Humidity 1 (4 more channels can be turned ON)

Temperature (humidity) recorder

Recording method: Dot Chart paper: Effective width 100 mm No. of inputs:

- < Temperature & humidity type > Temperature 5, Humidity 1 -100 to +200°C/0 to 100%rh
- < Temperature type > Temperature 6 -100 to +200°C

Time signal terminal

Adds additional terminals to the standard time signal terminals. (Standard : 2 terminals → 10 terminals)

Thermocouple

Attached to specimen to measure specimen temperature.

Thermocouple with a brass ball tip Thermocouple type T (Copper/ Copper-Nickel)

- 2 m
- 4 m
- 6 m

Additional overheat protector

Additional preventive measures can be taken for excessive temperature rise in the chamber, in addition to the standard equipped overheat protector.

Overcool protector

If the temperature inside the chamber decreases excessively, the chamber stops operating to prevent the specimens from being damaged.

Alarm output terminal

If the safety device of the chamber is activated, alarm signal will be sent to remote location through this terminal. Signal: terminal is closed on abnormal situation Accessory: plug

Location: in the control board

*The circuit shall be connected by customer.

Status indicator light

Please select lighted or blinking, and requirement of buzzer sound.

No. of levels: 1 Heigh: 214 mm No. of levels: 2 Heigh: 254 mm No. of levels: 3 Heigh: 294 mm No. of levels: 4 Heigh: 334 mm

Emergency stop pushbutton

Stops the chamber immediately.

380V AC, 400V AC spec

Chamber dew tray

Prevents water leaks from the chamber onto the floor.

Image

Operation manual

- CD
- Booklet

Reports & certificates

- · Testing and inspection report
- · Test data
- Temperature (& humidity) uniformity measurement
- Calibration report
- · Calibration certificate
- · Traceability certificate
- Traceability system chart

Safety precautions

- Do not use specimens which are explosive or flammable, or which contain such substances. To do so could be hazardous, as this may lead to fire or explosion.
- Do not place corrosive materials in the chamber. If corrosive substances or liquid is used, the life of the unit may be significantly shortened specifically because of the corrosion of stainless steel, resin and silicone materials.
- Do not use living organisms or items that exceed the allowable heat load as a specimen.
- Be sure to read the operation manual before operation.

Please contact us for non-standard specification.
