UP-6313 AKRON Abrasion Tester

Uses

AKRON abrasion tester is used with balance to test shoes, tires, rubber products such as good wear resistance force; Counter electronic is used automatic type, setting wear revolutions, reaches the set revolutions and automatic stop.

Specifications

Specimens: outer diameter 60.5 mm, inner diameter is 11.5 mm, 13 mm thickness, circumference of 220 mm, hardness of 60 ~ 70

Sand wheel: outer diameter 150 mm (W) of 25 mm, size # 36, each P, center hole 32 mm, abrasive for oxygen for aluminum

Sample tilt range: 0 ~ 45 ° Angle is 15 ° (test)

Sample shaft speed (BS) 250 + / - 5 r/min (GB) rubber wheel 34 to 76 + 2 r/min spindle + 1 r/min

Jose: 2 lb 6 lb

Balance weight: 2.5 kg

Counter: LCD, 0 ~ 999999

Product: 57 * 52 * 45 cm

weight : 57kg

power : 1ϕ, AC220V, 3A
