

Geotextile Abrasion Tester GT-C87

Application:

This Abrasion Tester is designed for anti-abrasion property of geotextile and its relative products. Its operation principle is: fixed sample on plate, under condition of specified pressure and abrasion action, using specified surface property abrasive to do friction, and finally obtain the result of sample tensile strength. Describe anti-abrasion property of sample by powerful percentage.

Key Specifications

Upper Plate Dimension	50×200mm	
Down Plate Dimension	50×200mm	
Down Plate Stroke	25±1mm	
Down Plate Frequency	90RPM	
Weight	40kg	
Sample Load	6±0.01kg	
Count Range	Count Range	
Power Supply	1 ¢ AC 220V 50/60Hz	
Dimensions	935×275×350mm	
Weight	50kg	
Standards accessories	1pc	Power Line
Optional accessories	Optional	GT-C01-3 Geotextile Tensile Machine
