

Cat.No.1408-00

Bimetal Thermometer for Soil Temperature

This is a drip proof bimetal thermometer for soil. An optimum soil temperature is essential for the plant growth. Use this thermometer for efficient plant cultivation.

Specifications

Measuring range	0 to 60°C
Accuracy	±1°C
Min. graduation	1°C
Materials	Case: ABS resin, Window: Acrylic resin, Sensing stem: Stainless steel (point-end)
Dimensions	Dial: Ø45 mm, Sensing stem: Ø4 x (L)150 mm
Weight	approx. 24 g
