

Preset Type Blood Specimen Collector (Blood collecting Performance Tester) GB-RB01

Application:

It is suitable for single-use human arterial blood collectors for piston exhaustability before blood collection, leakage of synthetic blood at the end of blood-taking period, and air tightness inspection of the system after blood collection.

Key Specification

Model	GT-RB02
Pressure of Hydrostatic Head	700mm(liquid column)
Inner Diameter of channel	≥2.5mm(liquid reservoir connects with channel)
Water Cycle System	(37±1)°C
Pressure of liquid reservoir	50kPa
Timer	0-99.99s/m/h, Accuracy: ±0.01
Standards	YY 0612 (4.4)
