Electric vertical machine

L-DZLS01

1. Use of electric vertical machine

The electric vertical machine is used for the test of tension and pressure load, plug and pull force, damage test and so on in rubber and plastic, light industry textile, building doors and Windows, composite material, wire material, wire and cable, automobile fittings, power machinery, scientific research institution and so on.

2. Parameters of electric vertical machine

Maximum test load: 1000N

Test stroke: 200mm

Test speed: 30-240mm/min

Maximum spacing: 215mm

Working voltage: single phase 220V

Rated current: 1.5a

Main circuit fuse: 3A

Control circuit fuse: 0.5A

Working temperature: 20+10℃

Storage and transportation temperature: -27℃ ~ +70℃

Relative humidity: 15% ~ 80%RH

Recommended

- 

  Automatic tool metallographic measuring instrument V400

- 

  Automatic tool metallographic measuring instrument V800

- 

  Automatic tool metallographic measuring instrument V1800

- 

  Automatic tool metallographic measuring instrument V2000
